CV OF BRIAN BO NIELSEN - DOTMAD.

I am: Business Intelligence Developer with business-oriented focus on particular Financial Intelligence, data warehouse and data modeling. "Value for money" and "return of investment is the core of our development projects. Enjoy doing project that really makes a difference.

I can: Organize training and workshops and gain a common understanding of business and data. Working with the value chain from raw data to decisions, combined with the company strategy and action plans. Support the organization with the required knowledge and support them with the correct knowhow for bringing the business further beyond.

I offer: Independent working resource who loves interaction of different apartments and networks. I enjoy doing software implementations and education for the customer.

I am: With my pleasant personality and tireless energy a door opener for new projects and solutions.

                          Training of users and develop and operate a complete BI
                          solutions together with a data warehouse.

Reason for job change.   An exciting job that meets my ambitions
                          and establish a strong career profile.

2007 - 2008   **Platon A/S.**

Short description of   The company was founded in Denmark in 1999 by a small
company   group of consultants with a great belief in a growing need in
                             the market for Data Warehousing solutions. The declared
                             mission of the company is "To support our clients in
                             managing and exploiting information as a strategic asset
                             through consulting services based on a unique Information
                             Management methodology".

Occupation.   Consultant.

Reference conditions   Consultant manager, Jan Zilstorf.

Responsibilities and   SAS consultant assistance to Fionia, Danish Bank, Pensam,
Business tasks.   Alm.Brand, Bank Data, Royal Arctic Line.
                             Primary consultancy implementations and methodology
                             within the SAS BI platform.

Challenges and   Many exciting challenges a consultant always working on
achievements.   concrete problems in different companies.
                             The primary purpose was to assist and building a robust and
                             secure solution that would be applied in daily operations.
                             Doing teaching and small seminars for the customers.

Reason for job change.   The company's intention was to create a Jutland
                             department, but it didn't succeed. An attractive offer by
                             Royal Arctic Line with particularly fine work conditions and
                             good salary was therefore an offer that was hard to refuse.

2005 – 2007	**Bankdata.**

Short description of company.	Bankdata is an IT company with 500 employees preferably with a banking and IT technical background. Bankdata is owned by 14 banks and providing total IT solutions to the financial sector. All IT as a bank needs - including online banking and advisory tools, but also maintenance and operations as well as PC support and training.
Occupation.	<u>Projectmanager.</u>
Reference conditions	Relationship Manager, Helle Veland.
Responsibilities and duties	Responsible for conversion of 6 banks for the new SAS Financial Management. Primarily involved with coordination, project planning, engineering, economics and analysis.
Challenges and Results.	Technically, I have done installation of 6 SAS FM machines and a commercial upgrade from version 4.1 to 4.2. Involved in the software procurement and hardware requirements. Prepared and conducted seminars for banks, among other things, focus on operations in SAS FM conversion. Prepared project plans for time, resources and economy.
Reason for job change.	Primary purpose was conversion of SAS FM. Consultation company Platon A/S offered med at new job.

2001 – 2005.	**Royal Arctic Line A/S.**
Short description of company.	Royal Arctic Line has app. 750 employees, spread out in different divisions and subsidiaries. Royal Arctic Line ltd. is the mothercompany and is owned 100% by the Greenlandic Self Rule Government. The container line between Greenland and the rest of the world, and between cities in Greenland are carried out by the vessels of Royal Arctic Line.
Occupation.	SAS Developer.
Reference conditions.	IT Manager, Søren G. Nielsen.
Responsibilities and duties	SAS Developer in Royal Arctic Line. Responsibility for operation, development and support our data warehouse.
Challenges and Results	Primary mission was to create values based on operational and transaction-based systems. Worked a lot with reporting, CRM and financial statements. About 40% programming and 60% business-oriented work. Working closely with colleagues and external consultants, we turned the SAS system to a stable system with a single version of the truth. Responsible for supplies - installation and configuration the new SAS server. The operating system was Windows 2000 server with RAID 5, configured with Active Directory and Internet Information Server version 6.0
Reason for job change	Projects were completed and automated. Looking for further challenges.

1999 - 2001   **Wonderware .**

Short description of   Danish distributor of industrial SCADA software and
company.   hardware for industrial use.

Occupation.   <u>Support Manager.</u>

Reference conditions.   Director, Alex Severin.

Responsibilities and   Support Manager for Scandinavia.
tasks.   Support responsible for the product Factory Suite ie. with
                           integration to office package through access to the PLC
                           system and industry databases.

Challenges and   Installing, updating and support tasks in the field, ie.
Results.   Dandy in Vejle, Elsam Skærbærk, Maersk Container in
                           Tinglev, Danish Crown in Vojens.

Reason for job change.   Company was acquired by U.S. distributor.
                           The resource in the company was knowledge, and when it
                           disappeared, I decided to seek new challenges.

1999   **Dator A/S.**

Short description of   Software Company for Crisplant A/S in Aarhus.
Company.   Developed Unix software for sorting post office, shoe
                             factories etc.
                             Total staff around 90 software developers.

Occupation.   <u>Software Engineer.</u>

Reference conditions.   Team leader.

Challenges and   Year 2000 security fix for SCO Unix.
Results.   Onsite fixing at destination in Norway and Germany.

Reason for changing   The focus was on development in SCO Unix.
jobs.   I got the opportunity for a career boost, and to work with
                             the Windows platform and the latest technologies.
